Do you want to create new concepts for sustainable design of our future cities and imagine the lifestyle?

It's your time to meet new people from different backgrounds and work in multidisciplinary teams. It's time to develop your skills and win The Hackathon Diploma.

**IT IS YOUR TIME TO CREATE THE FUTURE.**

THE FUTURE OF URBAN LIVING

# HACKATHON 2019

The Goal is to create concepts for a sustainable urban design and lifestyle.

Six multidisciplinary teams will work with different topics with the aim to find new concepts and guidelines for a sustainable future city design and imagine the urban lifestyle. You will Inspire and get inspired. You will meet experts and students from different backgrounds to expand your network and develop your skills. You will be awarded with The Hackathon Diploma 2019.

## LANDSKAPSLAGET

Landskapslaget is one of the largest independent Landscape Architecture, Urban Planning and Design firms in Sweden. Utilizing a broad knowledge base of different design specialties, we work with a variety of environments. Our aim is to design cities and landscapes as functional and attractive dwelling spaces. With 40 years of experience, we believe in people, in their imagination, creativity and innovative ideas to meet future challenges. Hackathon is a great opportunity to share and exchange new ideas with students.

## THE TOPICS

- Art and Culture in future cities
- Commercial activities, production and consumption in future cities
- Public health and well-being in future cities

## PARTICIPANTS

Only students will be allowed to apply.

We consider that all backgrounds are relevant for the development of our future cities, but for this event, students with the following background are mostly welcome to participate: Architecture, urban planning and design, landscape architecture, geography, history, culture, art, sport and health, IT, engineering and sociology.
